Maxcha: Is it profitable, and what should I change?

Revenue	Gross Profit	Cups Sold	Net Profit	Net Margin %
7.06K	4.01K	50	₱1.95K	27.58%

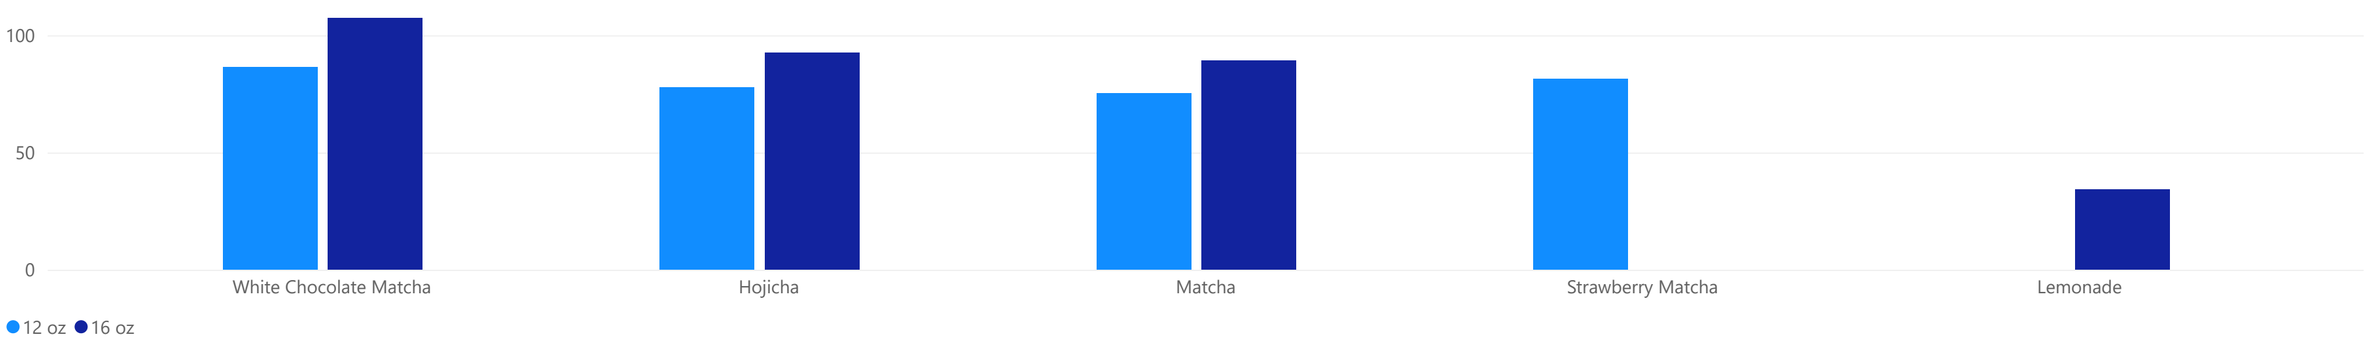

Profit by drink

Cups sold per week

Profit per cup: 12 oz vs 16 oz at today's menu prices

Key takeaways

1. Matcha and Hojicha 12 oz make 57% of gross profit, so I should keep them front and center and never run out of ingredients.
2. 16 oz earns ₱14–21 more per cup than 12 oz, but 72% of cups sold are 12 oz, so I should push the 16 oz upgrade.
3. Break-even is about 26 cups, and I'm at 50, so Maxcha is profitable (27.6% net margin), mostly because equipment was a one-time cost.
